

Aerial Work Platforms

Aerial Work Platform - There are lots of accessories designed for forklifts that can be used so as to help expand the capabilities of your lift truck and allow you to carry things, handle materials with less effort or to finish clean-up tasks.

Many of the accessories are specifically designed to be able to fit on the blades themselves. Blade extensions for instance, are utilized when you require a lot more blade length, which increases lifting capability. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another kind utilized whenever transporting rolled material to be able to ensure it does not roll off of the traditional flat forks.

Examples of lifting attachments consist of pivoting and telescoping crane or boom accessories. They could come in quite a few various kinds and are usually utilized for moving lumber, poles, metal bars and different kinds of bulky stuff. Other attachments like for instance other kinds of hook plates and hooks are presented so as to lift objects using a chain or sling. Slab lifters and magnetic filters are other stuff that can be used with hook accessories. Slab lifters are specialized attachments which are utilized for picking up a variety of materials that are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which connect to your lift truck so as to make moving rolls of carpet easier. The accessory hooks onto the lift truck's forks and has a pole that goes through the center of the carpet roll.

There are many types of lift truck accessory utilized for facility maintenance such as snow blades. These industrial blades can be connected to front end loaders and used for transferring materials like dirt, and mulch as well as snow. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers includes a broom which the lift truck blades connect onto for sweeping large spaces such as factory floors, parking lots and warehouse. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as 60 inches and this surface area makes clean up simple and fast.

A material spreader is another forklift accessory that is usually used at facilities. These spreaders are helpful for various applications such as spreading fertilizers, insecticides, seeds, ice melt, rock salt and pellets.

Work platforms are another optional lifting accessory that lots of companies utilize day by day. The platforms range in size from 36" x 36" to up to 60" x 60". There are some models available which are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location making use of the forklift. Larger platform models have extra space for employees to bring tools and other necessary objects for the job. Often work platforms are made of poly material or steel.
